MOTO DI PANTICELLE CAMCHE IN CAMPO MAGNETICO

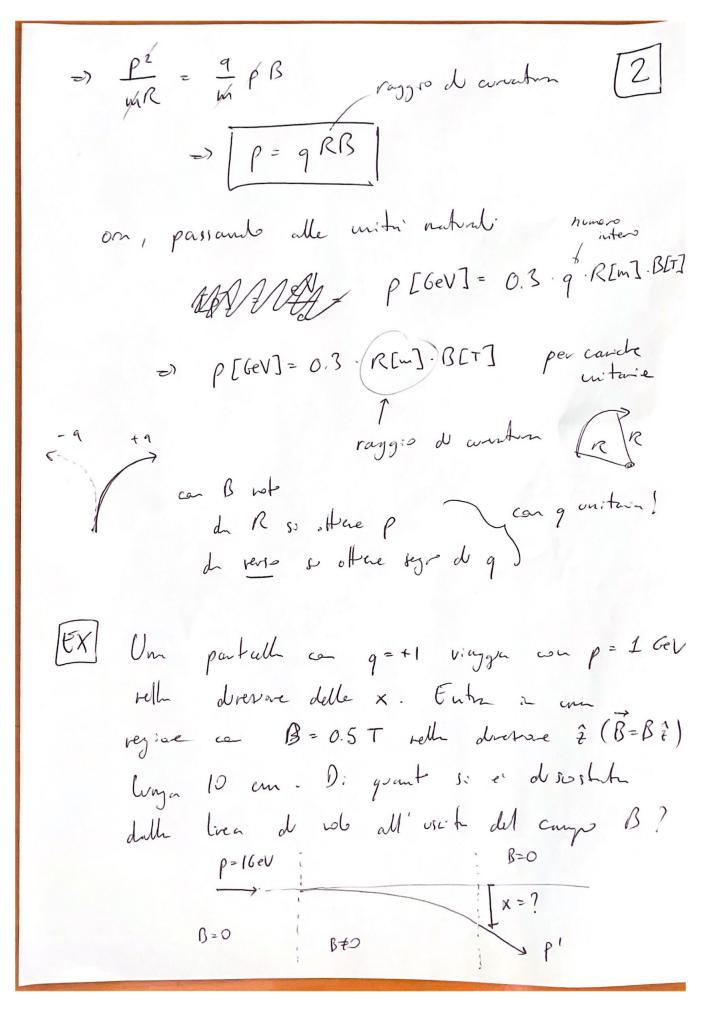

se c'i campe majretro B s use forta de Lorente par mison d'impelso

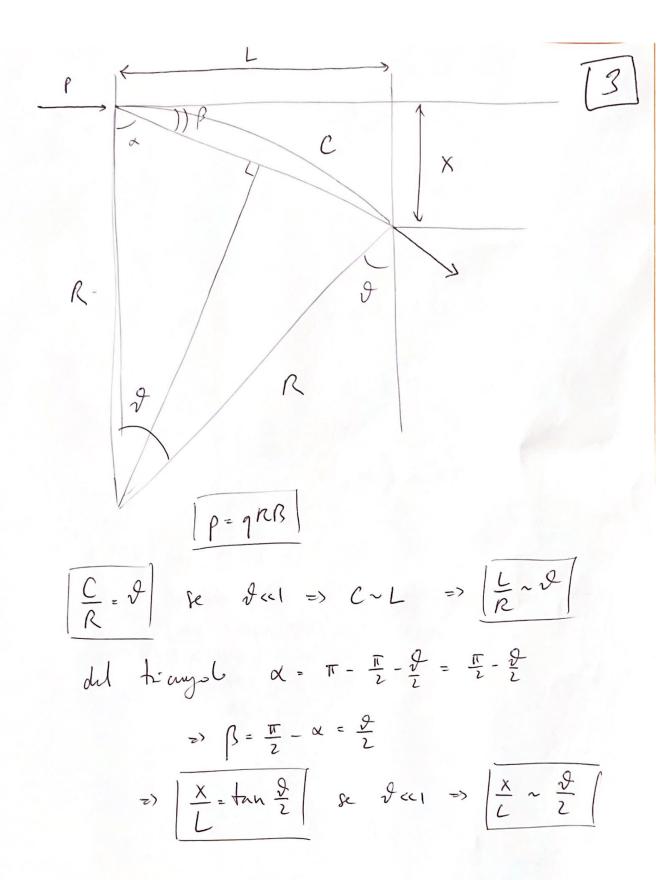

F= qvxB

in generale $\vec{p} = \vec{p}_{1} + \vec{p}_{\perp}$ (rispett a \vec{B}) Pu e' cont PI > FdL e not circlar =) mote i ou et en 30

Anuman p I B => F = quB = \frac{9}{100} p \ B $m = ma = m \frac{v^2}{R} = \frac{\rho^2}{mR}$ not

circle wiferere

$$\vartheta = \frac{L}{R} \Rightarrow \frac{K}{L} = \frac{L}{2R}$$

$$= \frac{X}{L} = \frac{L}{2\rho} qB$$

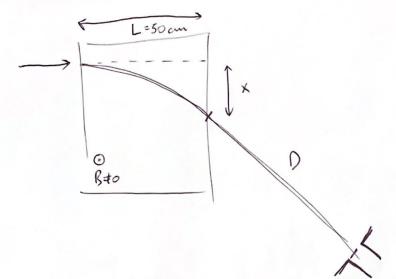

(a)
$$x = q \cdot \frac{BL^2}{2p} = 0.3 \quad \frac{B[T] \cdot L^2[m^2]}{2p[GeV]} = 0.3 \quad \frac{0.5 \cdot 0.1^2}{2 \cdot 1} = 0.00075 \text{ m}$$

$$= 0.75 \text{ mm}$$

grub ou d'en picch.

EX

Un force de p. lle car cuia te entre in us spettremente lungo 50 au car compo B=1.7 T In usion le partielle entre me un collemnte poste a D=10 m

(a) a de ditrup x dalle brea d'us invale excer delle regree de Camp myset is se homes p= 2 GeV?

de ejects de port $x = q \frac{BL^2}{2R}$

 $= 0.3 \frac{1.7 \cdot 0.5^2}{2.2} = 0.032 \, \text{m} = 3.2 \, \text{cm}$

(b) Grale dere esser le spense del collembre t.c. veyre selevonate solo ple con ± 0.5% d impulse vispet a valore nominule (2 GeV)?

(x) Insurac X= X(p)

x = x(p) the weak 6 $e = p_{MR} = 2 \text{ GeV} + 5\% = 2.01 \text{ GeV}$ p = 2 GeV p = 2 GeV p = 2 GeV - 5% = 1.95 GeV p = 2 GeV - 5% = 1.95 GeV p = 2 GeV - 5% = 1.95 GeV

In generale $\theta = \theta(\rho)$ in fall: $\theta = \frac{L}{R} = \frac{qLB}{\rho_R}$ $\Rightarrow \theta_{MN} = \frac{qLB}{\rho_{MN}} = \theta_{MN} = \frac{qLB}{\rho_{MN}}$

 $= 0.3 \cdot 0.5 \cdot 1.7 \left(\frac{2.01 - 1.99}{1.99 \cdot 201} \right) = 0.00127 \text{ mod}$ = 1.27 mod

d= DAD = 10m · 1.27 mond = 1.27 cm

(BX) Un berseylo d termbont d' lite (Liz B4 Dz, massa notecolare 169.11 g/mol, denstr' g = 2.4 g/am3, sperse d = 10 pm) Were irraggiate ca en frico de protoni ca E = 675 keV e potent P = 6.75 pW per produre p+"B → "C" - 3"He

Un welstre de copre il 30% dell'anyolo solde Okain 27000 reuxoni in un minuto

- à Cululare il numero de protesi de arrive sol basagles vell' until de tempo
- (5) In deusstri de barrage, sypende de l'assentant isotopse del "B e' 80%.
- (c) In serve d'ut del pocesso

1) PER L'ANNO PROSSIMO: C'e' tempo per 1-2 payine in più
